

# The Future of EDI 278 Prior Authorization Enablement

## Transform Your Prior Authorization Workflow with the Gen 3 278 EDI Platform

Healthcare organizations lose billions annually to prior authorization friction. Post-n-Track Gen 3 revolutionizes EDI 278 transaction enablement through automation and zero data retention architecture.

### Current Prior Authorization Challenges

- ✘ Chart and prescription attachment requirements (often faxes) are major sources of friction, slowing down processing and increasing denials
- ✘ Legacy transaction processors create delays, offer limited transparency and are challenged to meet the needs of more challenging prior authorization workflows, e.g., those that require supplemental information
- ✘ Frequent payer rule changes without proper notification causes more friction

### Leveraging Post-n-Track Gen 3 for 278 Processing

Post-n-Track Gen 3 transforms prior authorization workflows by eliminating reliance on traditional intermediaries. This reduces delays, improves visibility, and simplifies coordination.

### Platform Security and Compliance Advantages

- ✓ Zero data retention architecture eliminates PHI storage risk
- ✓ Comprehensive audit trails enable simplified compliance reporting
- ✓ P-n-T Data Corp never owns or stores your data

Security, privacy, and resilience are at the core of Post-n-Track. Our team is working tirelessly to achieve a zero-risk data sharing and residency environment.

## Advanced Platform Capabilities

- ✓ Real-time transaction processing with improved tracking
- ✓ Dynamic rule engines maintain alignment with current payer-specific integration and authorization criteria
- ✓ Piloting 278 and 275 transaction processing with a leading national payer

## Business Case for Advanced 278 Processing

- ✓ Significant ROI through reduced processing costs and improved efficiency
- ✓ Faster authorization decisions improve patient satisfaction
- ✓ Higher approval rates decrease appeals and resubmission time
- ✓ In depth experience with national payers creates strategic advantages

## The Path Forward

Organizations that adopt Post-n-Track Gen 3 capabilities improve compliance, lower risk from data exposure, and improve prior authorization workflows by eliminating data residency, embedding real-time data quality, and adapting to payer-specific requirements. These healthcare leaders are improving operational performance while protecting patient data.

Post-n-Track Gen 3 is more than a transaction tool. It's a strategic foundation for secure, scalable, and standards-aligned data exchange.

## Learn more about Post-n-Track Gen 3

**Post-n-Track Gen3** is 100% US based and is a service of P-n-T Data Corp., a verified Service-Disabled Veteran Owned Small Business (SDVOSB).
